Henry C. Query, Jr.
504 S. Pierce Ave.
Wheaton, IL 60187Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450Response to Office Action

This communication is responsive to the Office Action dated February 11, 2003.

Reconsideration of the above-identified application is respectfully requested.

Claim 1 stands rejected under 35 U.S.C. 102(b) as being anticipated by Knapp et al. (U.S. Patent No. 2,970,646). However, Knapp fails to disclose each and every element of claim 1. Therefore, this patent cannot be found to anticipate claim 1.

Knapp clearly does not disclose a debris cap which comprises a container that is pre-charged with a corrosion inhibitor and/or a biocide prior to installation subsea. In fact, Knapp does not disclose a debris cap at all. Rather, this patent discloses a chamber 11 which encloses the entire christmas tree 30.

Furthermore, the chamber 11 is not filled with a corrosion inhibitor and/or a

Attorney Docket No.: FMCE-P078

biocide prior to installation subsea. Instead, the chamber 11 is filled with a corrosion inhibitor only after it is installed subsea (see column 3, lines 13-15).

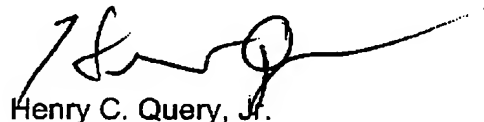

Therefore, Knapp cannot be found to anticipate claim 1.

The Examiner has indicated that claims 2-9 would be allowed if they are rewritten in independent form to include the limitations of their base and intervening claims. However, claims 2-9 depend from claim 1, which as discussed above is patentable over the prior art cited by the Examiner. Therefore, applicants submit that claims 2-9 do not need to be rewritten.

The prior art made of record but not relied upon has been considered but is not believed to be pertinent to the patentability of the present invention.

In light of the foregoing, claims 1-9 are submitted as allowable. Favorable action is solicited.

Respectfully submitted,

Henry C. Query, Jr.
